

STONE CARE

# FLOOR AMORE

## ONE STEP CLEANER

### SAFE ON

STONE, TILE  
AND HARDWOOD  
FLOORS

**NO RINSE FORMULA**  
Easy, Streak-Free  
Cleaning

**MB-1 Floor Amore** is a highly concentrated, slightly alkaline detergent with a twist! It is rinse-free and leaves no dulling film. Special organic salts in its formula act as “moisturizers” thus preventing natural stone from “drying out”. It also contains optical brighteners to enhance the finish of the surfaces on which it’s used and maintains a natural, streak free look. Originally designed for marble and granite, it is gentle enough to be safely used on hardwood, ceramic, resilient tile and any other hard surface not harmed by water.

### APPLICATION:

Stone, tile and hardwood floors

Mix approximately 1 to 3 fl. oz. (4 to 12 capfuls) - according to the level of soil on the floor with 1 gallon of warm water, then mop as usual.

**DO NOT RINSE.** Rinsing would remove the organic salts in the formula that were designed to remain on the floor surface. **DO NOT** use more product than the proportion indicated. Though no damage would occur, rinsing would be necessary.

### SPECIFICATIONS:

|                                |                 |
|--------------------------------|-----------------|
| Appearance.....                | Blue Liquid     |
| Odor.....                      | Sassafrass Odor |
| Specific Gravity.....          | 1.01            |
| pH.....                        | 10.0            |
| Boiling Point.....             | Near 212°F      |
| Flash Point.....               | None to boiling |
| Water Solubility in Water..... | Complete        |
